EXPLANATIONS OF RECORDS IN THE REGISTER BOOK.

(All abbreviations employed in the Register Book are explained in the alphabetical key, see page xxviii.)

Steamers, columns 2 & 3; Sailing Vessels, columns 3 & 4.

Master. The figures which follow the master's name, thus, *Smith* 86–97, indicate the dates of his appointment (1) as master in the service of the present owner of the vessel, and (2) as master of the vessel herself.

Decks. See illustrations of types of vessels, following page xl of key. Explanations of such terms as *Shade dk.*, &c., are included in the alphabetical key, see page xxviii.

3 *Dk. rule*......This notation indicates that the vessel has been built according to the Rules for three-decked vessels.

Special Surveys. Explanations of records of special periodical surveys will be found in the alphabetical key, see page xxviii. The records only certify to the vessel's state of efficiency *at the time of survey.*

Ports of Survey. The contractions (such as Lon., Syd., &c.), used to denote the ports at which vessels have been surveyed, are explained at page xxxii.

Rig, &c. Explanations of contractions used to denote the rigs of vessels will be found in the alphabetical key, see page xxviii.

† ....This sign following the word "*salted*" indicates that the vessel's beams have not been salted.

Steamers, column 4; Sailing Vessels, column 5.

Tonnage. The tonnage recorded in the Register Book in type like that shown at the side hereof, is, with a few exceptions, the official registered tonnage measured according to the law of the country to which the vessel belongs.

Characters of vessels built of Iron or Steel according to the Rules of the Society since 1869. The numerals 100, 90, &c., do not signify terms of years, but are intended for the purpose of comparison only.

A1 ....This character (without a numeral prefixed) is assigned to Iron or Steel vessels built for special purposes or trades, to the satisfaction of the Committee.

*Â1 ....Character of Iron vessels built with thicker plating than required for Â1.

Â1 B̂1 Ĉ1 Characters of Iron vessels built according to the Rules of the Society in force between the years 1864 and 1871.

A1 ....Character of Wood or Composite vessels of the first class well and sufficiently equipped. The figures in column 5 (Steamers), column 6 (Sailing Vessels), prefixed to the character indicate the term of years for which the vessel is at present classed, thus :—11A1, Cont 6A1, Rest 6A1. (See notes in alphabetical key, page xxviii, under "Cont" and "Rest"). The figures in column 7 (Steamers), column 8 (Sailing Vessels) indicate the expired terms of years originally assigned, if on the first line, and assigned on continuation if on lower lines.

A1 ....Character of vessels which have passed the period assigned on original Survey, or Continuation, or Restoration, and of vessels not having an original character, which are found to be fit to carry dry and perishable goods. The term of years for which this character is assigned appears under the class in column 5 (Steamers), column 6 (Sailing Vessels), thus :— SSPly.06–6yrs.

Æ1 ....Character of vessels fit for conveyance of dry and perishable goods on short voyages. The term of years for which the character Æ is assigned appears under the class in column 6 (Sailing Ships), thus :—SSPly.06–4yrs.

1 ....The figure 1 included with the characters, as printed above, signifies that the vessel is well and efficiently equipped as per Tables 30 & 31 (see the Society's Rules).

— ....This sign placed after a character, in the position usually occupied by the figure 1, indicates that the equipment of the vessel—either as regards its quality or its quantity—does not fulfil the requirements of the Society's Rules.

✠ ....This sign denotes that the vessel has been built under Special Survey.

✠ ....This sign denotes that the engines or the boilers, or both (according to the record which follows) have been built under Special Survey.

——
3,10 ....A black line, with date underneath, indicates that the vessel's character was expunged from the Register Book at the date specified because from reported defects the vessel was not entitled to retain her classification.

——
3,10 ....A red line, with date underneath, indicates that the vessel's character was expunged from the Register Book at the date specified because from non-compliance with the Society's Rules as regards surveys, the vessel was not entitled to retain her classification.

... .This sign in column 7 (Steamers), column 8 (Sailing Vessels), indicates that the vessel's class was withdrawn from the Register Book at the Owner's request.

~~100A1~~ ......When a posting of loss, condemnation, casualty, &c., is made against a classed vessel, the character is expunged in this manner.

with freeboard This notation under the character signifies that the freeboard assigned is a condition of the vessel's class.

For tug purposes, Trawler, &c. Such notations under the character indicate the special trade or purpose for which the vessel is intended and in view of which she has been classed by the Society.

Awng dk., Shade dk., &c. See illustrations of types of vessels, following page xl of key. Explanations of such terms as shade deck, awning deck, &c., are included in the alphabetical key to the abbreviations, see page xxviii.

Symbols of Classification of the late Underwriters' Registry.

(Amalgamated with Lloyd's Register in 1885).

A1⁑ A1⁑ ...Characters of Iron or Steel vessels built in excess of the Rules of the Underwriters' Registry and of extra quality of Iron.

A1* A1*
A1, A1,...
A, A,......
Characters of Iron, Steel, or Composite vessels built according to the Rules of the Underwriters' Registry.

Vessels classed in red were built under the inspection of the Surveyors to the Underwriters' Registry.

The figure 1 or 2 affixed to Symbols of Classification signifies the Character of Equipment.

Last date of Survey. The figures under a character denote the date when the vessel was last surveyed. The *date of survey* only certifies to the vessel's state of efficiency *at that time.*

Ports of Survey. An explanation of contractions used to indicate surveying ports will be found on page xxxii.

The 6th, 7th, and 8th columns (Sailing Vessels), or 5th, 6th, and 7th columns (Steamers) left blank, indicate that the vessel has never been classed in the Register Book.

When the 6th (Sailing Vessels) or 5th (Steamers) column is left blank, except as regards the date of survey last recorded, it indicates that the character has expired, or that it has been withdrawn either for want of survey or on account of non-payment of fees due in the case.

Steamers, column 8; Sailing Vessels, column 9.

Date of Build. In the case of Iron and Steel vessels classed by Lloyd's Register, the last date of survey for first entry of classification is reckoned as the date of build when such survey is completed within six months of the date of launching for vessels under 10,000 tons gross, nine months for vessels of 10,000 tons and under 20,000 tons gross, and twelve months for vessels of 20,000 tons gross and upwards. When, however, the first entry survey is not completed within the period allowed, the date of build will be taken as six, nine, or twelve months after the date of launching, as the case may be. In the case of classed Iron and Steel vessels launched prior to the 19th May, 1887, and also in the case of all classed Wood and Composite vessels, the date of launch is reckoned as the date of build. In the case of vessels not classed by Lloyd's Register, it is not possible to define in all cases whether the date of build is the date of launch or the date of completion.

Records such as $18\frac{65}{94}$ occur in the case of some unclassed vessels. These denote that the vessel was originally built at the date indicated by the upper figures, and is reported to have been rebuilt at the date indicated by the lower figures. In such cases, the Society has no authoritative information as to the extent to which the reported rebuilding has been carried out

Rebuilding of vessels, when carried out under the inspection and to the satisfaction of the Society's Surveyors, is recorded thus :—"rebuilt 89."

Steamers, column 10; Sailing Vessels, column 12.

Owners. In the case of vessels belonging to the United Kingdom, the name recorded in the Register Book is that of the Managing Owner, or of the firm in which the Managing Owner is a partner. When there is not a Managing Owner appointed, the name of the largest shareholder is recorded; and the name of the Manager of the vessel is also noted if desired. For colonial or foreign vessels, it is endeavoured to follow the same practice as for United Kingdom vessels; but obvious difficulties render it impossible to ensure that a person entered as Managing Owner is really a legal owner. He may therefore sometimes be only the *Manager* of a vessel as distinguished from the Managing *Owner*.

Steamers, column 11; Sailing Vessels, column 13.

Dimensions. The Registered dimensions of vessels in these columns are recorded in feet and tenths of a foot.

Depth. When two depths are recorded, thus: $\frac{16{\cdot}9}{24{\cdot}2}$ the upper figures denote the depth to main deck and the lower figures the depth to the upper, spar, awning or shelter deck. This practice is most frequently adopted in the cases of vessels which have a spar, awning or shelter deck.

Deck Erections. See illustrations of types of vessels, following page xl.

Water Ballast. See explanations and illustrations on page xxxi of key.

Steamers, column 12; Sailing Vessels, column 14.

Water Ballast. See explanations and illustrations on page xxxi of key.

Steamers, column 13.

All contractions used in relation to Engines, Boilers, Furnaces, &c., are explained in the alphabetical key, see page xxviii.

Nominal Horse Power (NHP) The formulæ from which the Nominal Horse Powers are calculated are :—

1. In cases of vessels in which the particulars of boiler pressures and surfaces are known :—

$$\text{NHP} = \frac{P+340}{1000}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right) \text{ where the boiler pressure is below 160lb.}$$

$$= \frac{P+590}{1500}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right) \text{ where the boiler pressure is 160lb or above.}$$

If the boilers are fitted with Forced Draught or Induced Draught appliances, then $\frac{H}{12}$ is taken instead of $\frac{H}{15}$.

2. In cases where particulars of the boiler pressures and heating surfaces are not known :—

$$\text{NHP} = \frac{D^2\sqrt{S}}{100} \text{ for Triple and Quadruple Expansion Engines}$$

$$\text{NHP} = \frac{D^2\sqrt{S}}{120} \text{ for Compound Engines.} \qquad \text{NHP} = \frac{D^2\sqrt{S}}{130} \text{ for Simple Engines.}$$

In the above Rules, D = diameter of L.P. Cylinder in inches. S = Stroke in inches. H = Heating surface in square feet. P = Working pressure in lb per square inch.

Registered Horse Power (RHP) This note shows that the horse power given is the nominal horse power as recorded in the Official Register of the vessel.

Water Ballast. See explanations and illustrations on page xxxi of key.

Steamers, column 14; Sailing Vessels, column 15.

Moulded Depth. The moulded depth of an Iron or Steel vessel is the perpendicular depth taken from the top of the upper deck beam at side, at the middle of the length of the vessel, to the top of the keel and the bottom of the frame at the middle line. In Wooden and Composite vessels the moulded depth is the perpendicular depth from the top of the upper deck beam at the side of the vessel amidships to the lower edge of the rabbet of the keel.

In Wooden and Composite vessels where the lower part of the midship transverse section is of a hollow character (as in cases where thick garboard strakes are fitted) the moulded depth is measured from the point where the line of the flat of the bottom cuts the keel.

Steamers, column 15; Sailing Vessels, column 16.

For explanations of symbols used to denote the Registers in which a vessel is classed (if she is not classed in Lloyd's Register Book), see alphabetical key, page xxviii.

Board of Trade Passenger Certificate. The note "till 6,11" indicates that the certificate expires at the date specified, June 1911.

Steamers, column 16.

Date when the Tail Shaft was last seen. The letter N preceding the date of last survey of the tail shaft (thus N 10,09) indicates that the tail shaft was *new* at that time. The letters P and S indicate respectively the last survey of *port* and *starboard* shafts.

Mean Drafts. The figures in the columns represent the mean drafts corresponding to an immersion of 65, 70, 75, and 80 per cent. respectively, as assigned by the late Underwriters' Registry, but these drafts do not indicate approved load lines.

Marques de Classification de l'ex Underwriters' Registry.

(Réuni avec le Lloyd's Register en 1885.)

A1⁑ A1⁑ ……	Cotes des navires en fer ou en acier construits avec des échantillons plus forts que ceux exigés par les règlements de l'Underwriters' Registry et avec des fers de qualité extra.
A1* A1*… A1, A1,…… A, A,………	Cotes des navires en fer, en acier ou composites, construits conformément aux règlements de l'Underwriters' Registry. Les navires cotés en rouge ont été construits sous la surveillance des Inspecteurs de l'Underwriters' Registry. Les chiffres 1 et 2 à la suite des marques de classification indiquent la cote de l'armement.
Date de dernière Visite.	Les chiffres sous une cote indiquent la date de dernière visite. La date de visite certifie seulement la condition du navire à ce moment.

Ports de Visites. Les abréviations employées pour indiquer les ports de visites sont expliquées à la page xl.

Les 6^{me}, 7^{me}, et 8^{me} colonnes (navires à voiles) ou les 5^{me}, 6^{me}, et 7^{me} colonnes (navires à vapeur) laissées en blanc, indiquent que le navire n'a jamais été coté dans le "Lloyd's Register Book."

La 6^{me} colonne (navires à voiles) ou la 5^{me} colonne (navires à vapeur) laissée en blanc, sauf en ce qui concerne l'époque de la dernière visite enregistrée, indique que la cote est expirée ou bien qu'elle a été rayée soit pour manque de visite, soit pour non paiement des honoraires dûs dans ce cas.

Navires à Vapeur, colonne 8 ; Navires à Voiles, colonne 9.

Date de Construction. Pour les navires en fer et en acier cotés par le Lloyd's Register, la date de la dernière visite d'inspection pour l'entrée en cote est considérée comme étant la date de construction, à condition que la susdite visite soit passée dans les six mois qui suivent la date du lancement pour les navires d'un jaugeage brut inférieur à 10,000 tonneaux ; dans les neuf mois pour ceux d'un jaugeage brut de 10,000 tonneaux et au-dessus, mais inférieur à 20,000 tonneaux, et dans les douze mois pour ceux d'un jaugeage brut de 20,000 tonneaux et au-dessus. Cependant, si l'inspection pour l'entrée en cote n'est pas terminée durant la période stipulée, la date de construction est calculée six, neuf ou douze mois après celle du lancement, suivant le cas. Pour les navires en fer et en acier cotés et lancés antérieurement au 19 Mai 1887, ainsi que pour tous les navires cotés en bois et composites, la date du lancement est considérée comme étant celle de la construction. Pour les navires non cotés par le Lloyd's Register, il n'est pas possible dans tous les cas de spécifier si la date de construction est celle du lancement ou celle de l'achèvement des travaux.

Des annotations telles que $18\frac{65}{94}$ figurent pour quelques navires non cotés. Les chiffres supérieurs indiquent alors la date originelle de la construction, les chiffres inférieurs la date à laquelle le navire a été rapporté comme reconstruit. Dans ce cas la Société ne peut spécifier l'importance de la reconstruction.

Navires à Vapeur, colonne 10 ; Navires à Voiles, colonne 12.

Armateurs. Pour les navires appartenant au Royaume Uni, le nom qui figure sur le "Lloyd's Register Book" est celui de l'armateur-gérant ou celui de la Société dont l'armateur-gérant fait partie. Lorsqu'il n'y a pas d'armateur-gérant, le nom qui figure est celui du plus gros actionnaire et le nom du gérant figure aussi si on le demande. Pour les navires coloniaux et étrangers, l'on a essayé de suivre le même usage que pour les navires du Royaume Uni, mais de sérieuses difficultés empêchent de certifier qu'une personne mentionnée comme étant armateur-gérant est aussi en réalité armateur légal. Dans certains cas par conséquent, la personne dont le nom figure peut n'être que gérant ce qui est absolument distinct d'armateur-gérant.

Navires à Vapeur, colonne 11 ; Navires à Voiles, colonne 13.

Dimensions. Les dimensions de douane des Navires, dans ces colonnes sont indiquées en pieds et en dixièmes de pieds.

Creux. Quand deux creux sont mentionnés, ainsi $\frac{16{\cdot}9}{24{\cdot}2}$ les chiffres supérieurs indiquent le creux au pont principal et les chiffres inférieurs le creux au pont supérieur des navires spar, awning ou shelter deck. Cet usage s'applique surtout aux navires spar, awning ou shelter deck.

Constructions sur les Ponts. Voir les dessins des différents types de navires à la suite de la page xl.

Water Ballast. Voir explications et dessins à la page xxxix de la Table Explicative.

Navires à Vapeur, colonne 12 ; Navires à Voiles, colonne 14.

Water Ballast. Voir explications et dessins à la page xxxix de la Table Explicative.

Navires à Vapeur, colonne 13.

Toutes les abréviations employées se rapportant aux Machines, Chaudières, Foyers, &c., sont décrites dans la Table Explicative, voir page xxxvi.

Force en Chevaux nominaux (NHP) La force en chevaux nominaux est calculée d'après les formules suivantes :—

1°. Si les pressions et les surfaces de chauffe sont connues :—

$$\text{NHP} = \frac{\text{P}+340}{1000}\left(\frac{\text{D}^2\sqrt{\text{S}}}{100}+\frac{\text{H}}{15}\right) \text{ pressions au-dessous de 160 livres.}$$

$$= \frac{\text{P}+590}{1500}\left(\frac{\text{D}^2\sqrt{\text{S}}}{100}+\frac{\text{H}}{15}\right) \text{ pressions de 160 livres et au-dessus.}$$

Pour les chaudières à tirage forcé on devra substituer dans les formules ci-dessus, $\frac{\text{H}}{12}$ à $\frac{\text{H}}{15}$.

2°. Si les pressions et les surfaces de chauffe ne sont pas connues :—

$$\text{NHP} = \frac{\text{D}^2\sqrt{\text{S}}}{100} \text{ Machines à Triple et Quadruple expansion.}$$

$$\text{NHP} = \frac{\text{D}^2\sqrt{\text{S}}}{120} \text{ Machines Compound.} \qquad \text{NHP} = \frac{\text{D}^2\sqrt{\text{S}}}{130} \text{ Machines Simples.}$$

Dans les formules ci-dessus D = diamètre en pouces du Cylindre B.P. S = Course du piston en pouces. H = Surface de chauffe en pieds carrés. P = Pression de travail en livres par pouce carré.

Force Officielle en Chevaux (RHP) Cette annotation indique la force en chevaux nominaux d'après le Registre Officiel du navire.

Water Ballast. Voir explications et dessins à la page xxxix de la Table Explicative.

Navires à Vapeur, colonne 14 ; Navires à Voiles, colonne 15.

Creux sur quille. Le creux sur quille pour les navires en fer et en acier, est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur sur le coté et au milieu de la longueur du navire, jusqu' à hauteur de la rencontre de la face inférieure de la membrure avec le dessus de la quille sur la ligne médiane. Pour les navires en bois et composites, le creux sur quille est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur jusqu' à hauteur de l'arête inférieure de la rablure de quille.

Pour les navires en bois et composites dont les parties inférieures sont frégatées (lorsqu'un navire est pourvu par exemple de galbords épais) le creux sur quille n'est alors calculé que jusqu'à hauteur de l'intersection de la ligne prolongée des fonds avec la quille.

Navires à Vapeur, colonne 15 ; Navires à Voiles, colonne 16.

Pour l'explication des marques employées pour indiquer les différents Registres auxquels un navire est coté (s'il n'est pas coté au Lloyd's Register), voir Table Explicative page xxxvi.

⁂ Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

⁂ Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.
